Portfolio: nefelilemessiou.com | LinkedIn: linkedin.com/in/nefelilemessiou

Summary

An industrial designer working at the intersection of objects and the interfaces beside them. Strongest in research, framing, and iteration. Comfortable across hardware and software, with hands-on experience in electronics prototyping, companion app design, and the UX that ties them together.

Experience – Selected Projects

onaka — IoT health tracker and companion app

MA Final Project, Royal College of Art · 2024–2025

- Designed an end-to-end system, pocketable device and companion app, for people managing chronic GI conditions
- User research with patients and clinicians; synthesised findings into low-cognitive-load logging and tactile feedback principles
- Prototyped electronics (Arduino, Blynk IoT) and form (3D printing, silicone casting); designed the companion app end-to-end in Figma and Lovable

period. — Tangible cycle tracker with companion app

BA Final Project, University of Edinburgh · 2023–2024 · First Class Honours

- Designed a fan-shaped physical calendar with voice assistant and app, making cycle data visible without opening a phone
- User research and competitive audit; usability sessions with women aged 18–35 informed the final concept
- Built working prototypes in wood and copper with Raspberry Pi; designed the companion app from scratch in Figma

Other projects on portfolio: Vattenkanna, AirFlux (Industrial) · Milo, Ilia (Interaction) · NUMA (Digital UX)

Education

MA Design Products — Royal College of Art, London (2024–2025)

BA Product Design (First Class Honours) — University of Edinburgh (2020–2024)

Exhibitions

RCA Degree Show 2025 — *Onaka*

New Designers 2024 — *period.*

ECA Graduate Show 2024 (*co-curator and graphic designer for the show*) — *period.*

Skills

Design: User Research, Usability Testing, Journey Mapping, Information Architecture, Wireframing, Interaction Design, UI, Design Systems, Branding, CMF, DFM

Tools: Figma, Fusion 360, Blender, Adobe Suite, Lovable, Framer, Miro, Notion

Prototyping: 3D printing, Laser Cutting, Silicone Casting, Arduino, Raspberry Pi, Blynk IoT

Languages: English (*fluent*), Greek (*native*)
